Due to bad weather (snow/ice), we were unable to tell if your vehicle was pulling or not - or if have vibration. If you have problems, please let us know.

We recommend having tires retorqued to manufacturer's specifications within the first 50 miles, plus check periodically. Aluminum, non-coined, custom wheels - this is especially IMPORTANT. We also take necessary precautions to keep your tire from coming loose - including putting lock-tight on the studs to keep them from backing off and we torque to factory specifications. If you do not wish to do this yourself, stop in the shop and we will check them for you.
Thank You for your business. Please visit our website - www.williamsnorwalktire.com and follow us on Facebook for our current promotions!
